Ngoc Phu Anh Nguyen

Full-Stack Developer | Payments and Integrations

Canberra, ACT | Full work rights | 0412 404 185 | john.phuanhnguyen.dev@gmail.com
linkedin.com/in/john-phuanhnguyen-dev | github.com/phuanh20001 | johnnguyen-portfolio.vercel.app

SUMMARY

IT graduate (2026) and full-stack developer focused on payments and integrations. Sole developer of Muster POS, in production since August 2026 as the till a Canberra cafe trades on every day, with a card terminal connection accredited by Linkly. Also builds Tavernforge, a C#/.NET hobby project, in a team of two.

EXPERIENCE

Software Engineer (Maintenance and Support), Ichi Cafe, Kippax, ACT 2026–Present

musterpos.com | github.com/phuanh20001/Muster-POS | Live demo: demo.musterpos.com (staff PIN 1111)

- Built Muster POS (Next.js, PostgreSQL, Prisma) as a self-funded project in 2026; once every in-store sale ran through it, moved into a paid role to maintain it and build the cafe's website and online ordering
- Connected Stripe, Square and the bank's card terminal so the till works the same with any of them; refunds go back the way the money came in, and a report flags any sale that is out by even one cent
- Built the direct connection to the bank's card terminal instead of using a ready-made plugin, letting the cafe move in-store payments from Square to its bank's lower card rate; passed accreditation in September 2026 with Linkly, which connects tills to bank terminals (listed in Linkly's public directory)
- Developed with AI coding agents (Claude Code) with guardrails: a written plan, automatic checks on anything that could cut access to the live till, and 700+ automated tests before every release

Web Development Intern, Onyamarks Nov 2025–Feb 2026

- Designed front-end layouts in Canva, made small code changes and supported SEO at a web agency

Waiter, Ichi Cafe, Kippax, ACT 2023–Present

Customer and Food Service, Kingsley's Chicken, Canberra, ACT 2023–Present

- Cover counter, kitchen and some manager shifts in a high-volume fast-food restaurant

TECHNICAL SKILLS

Programming & data: JavaScript, SQL (PostgreSQL), Python, Java, C#
Web: React, Next.js, Node.js, ASP.NET Core, Prisma, Tailwind CSS
Payments & hardware: Stripe, Square, Linkly / PC-EFTPOS card terminals, ESC/POS receipt printers
Testing & DevOps: Node.js test runner, ESLint, GitHub Actions, CI/CD, Git, PowerShell, Cloudflare, Vercel
Practices: AI coding agents (Claude Code) with guardrails, Windows administration

PROJECTS

Tavernforge, Hobby project in a team of two (code on request) C#/.NET 10, React/TypeScript, PostgreSQL

- Online D&D tabletop, built so our group could play in one app, not three (maps, character sheets, dice)
- Own the Windows installer: one setup file lets a non-technical host run the app and its database on their own PC and invite players over a secure link, with backups and restore; our DM set it up in 4 minutes
- Work through design documents, code review and joint testing; cut test time from 13 to 8 minutes

AntiqChain, University capstone github.com/phuanh20001/AntiqueSystem

- Led a team of 4 as project manager and architect on an antiques marketplace that records each authenticity decision on a blockchain (Node.js, Express, MongoDB, Solidity)

EDUCATION

Bachelor of Information Technology, Crown Institute of Higher Education, Canberra, ACT 2023–2026

Bachelor of English Pedagogy, Saigon University, Vietnam 2018–2023

LANGUAGES AND REFEREES

Languages: Vietnamese (native), English (fluent)
Referees: Owner, Ichi Cafe, and two Managers, Kingsley's Chicken. Contact details available on request.
